This leaflet is for guidance and is designed to assist you in determining the charges for building work applications, notices and inspections to which Building Regulations apply. Full details of charges are contained within the Building (Local Authority Charges) Regulations 2010 and the Middlesbrough Council Scheme of Building Regulation Charges, which is available to view by contacting the Building Control Service.

Making an Application/Submitting a Notice
Application and Notice forms are available from the address shown below or can be downloaded from the Council’s website. Applications and notices can be submitted:

- Online, a link provided from the Building Control section of the Council’s website. Applicants/agents are encouraged to submit by this method if possible.
- By email, to buildingcontrol@middlesbrough.gov.uk
- By post, to the address shown below.

When the application or notice is submitted online or by email, the payment must be sent separately.

How to use the table to calculate your building regulation Charges
The charges for Building Regulation work are required to cover the cost of the service, with the exception of work carried out for the benefit of people with a disability (see details below). Charges are either ‘Standard Charges’ or ‘Individually Determined Charges’.

‘Standard Charges’ for specific types of building work, both domestic and non-domestic, are detailed in the following Tables A to E.

‘Individually Determined Charges’ generally apply to larger and/or more complex building projects. If the building work is not detailed in Tables A to E, then an ‘Individually Determined Charge’ is applicable. If the building work involves the construction of multiple extensions and/or multiple types of alterations, carried out at the same time, the ‘Standard Charges’ will be reduced. Under these circumstances an ‘Individually Determined Charge’ is applicable. Please contact Building Control for further details.

Full Plans Application
The ‘Plan Charge’ is payable when the application is submitted to the Council. A Full Plans Application is not legally deposited until payment is received. The applicant will be invoiced for the ‘Inspection Charge’ after the first site inspection has been carried out. Agents should ensure that their clients are aware that an inspection charge will be invoiced when building work starts, and should advise them how much that charge will be.

Building Notice
The ‘Building Notice Charge’ is payable when the notice is given to the Council. A Building Notice Application is not considered deposited until payment is received. This charge is the total of the ‘Plan Charge’ and ‘Inspection Charge’ combined.

Regularisation Certificate Application
The ‘Regularisation Charge’ is payable when the application is submitted to the Council. A Regularisation Certificate Application is not legally deposited until payment is received. No VAT is applied to this type of application, Regularisation charges are based on 140% of the standard charge.

Work for People with Disabilities
In certain circumstances, where building work is solely for the benefit of people with disabilities, charges may not be payable. A person with disabilities is a person to whom section 29 (1) of the National Assistance Act 1948 (as extended) applies. A certificate or letter may be required from a health professional in support of an application for exemption from charges.

Factors taken into account in determining the charge category:
Depending upon the nature of the project, the following factors can be taken into account in determining the relevant charge category using the attached tables:

- **Floor Area** - The total internal floor area of all storeys of the building or extension of the building
- **Estimated Cost of Building Work** – Accepted by the local authority as being a cost reasonably charged by a person in business to carry out such building work.
- Charges may not apply in relation to an existing building to which the public are admitted and where the whole of the building work is for the purpose of providing means of access for disabled persons by way of entrance or exit to or from the building or any part of it; or for the provision of facilities designed to secure the greater health, safety, welfare or convenience of disabled persons. Due to the complexity of the regulations giving exemption please contact Building Control directly to seek further clarification where appropriate.
Payment
Payment can be made by:
Cheque, made payable to Middlesbrough Council.
Cash, delivered in person.
Credit/Debit card, by phoning Building Control.

Our standard charges have been set on the basis that:
• The inspection framework and approved plans (where relevant) should provide the local authority with reasonable evidence that your completed project complies with minimum Building Regulation requirements.
• The purpose of the service provided by Local Authority Building Control is to check as far as reasonably practicable, that Building Regulation requirements are satisfied. It must be appreciated that site visits only constitute a spot inspection.
• The inspection framework and fee charged for dealing with the building regulation application assumes that persons employed by the applicant to undertake the design and building work are competent. If you require a more extensive supervisory service of building work, you are advised to employ a suitably qualified person to carry this out on your behalf.
• The building work does not consist of, or include, innovative or high risk construction techniques and/or the duration of the building work from commencement to completion does not exceed 12 months.

Other charges/refunds:
• If the basis on which the charge has been determined changes, the Local Authority may refund or request a supplementary charge. The Authority will provide a written statement setting out the basis and method of calculation for the refund.supplementary charge.
• An Additional charge of £410.00 + VAT is payable for works when the relevant building work, or part thereof, has not been carried out by a person referred to in regulation 7(5) (g) of (h) of the Building (Local Authority Charges) Regulations 2010. This is in addition to the inspection charge, building notice charge, regularisation charge or reversion charge.
• Refunds - A fee of £50.00 + VAT will be charged for the withdrawal of a Building Regulation application prior to plan assessment being carried out and/or site inspection being made. Any refund on a Building Regulation application withdrawn after the local authority have begun the plan assessment and/or site visit(s) undertaken, will be at the discretion of the Council and on an individually determined basis.

Email: buildingcontrol@middlesbrough.gov.uk
Website: www.middlesbrough.gov.uk

STANDARD CHARGES
These ‘Standard Charges’, detailed in Tables A to E, have been set on the following basis:
• The building work does not constitute or include innovative or high-risk construction techniques.
• The duration of the building work from commencement to completion does not exceed 12 months.
• The building work is undertaken by a person/company that is competent to carry out the design and building work. If they are not, supplementary charges may be incurred.
Additional charges may be invoiced at completion stage, where the relevant competent person scheme information cannot be provided. Charges include VAT at 20%

Should submitted structural calculations be produced by a non-qualified person, additional charges are likely to be requested to cover the cost of checking those calculations (usually £150 + Vat per check). If calculations have to be checked more than once due to needing corrections or similar then additional fees may also apply.
Charges for different types of building work are detailed in the following tables:

</tr>
</tbody>
</table>

**Notes:**

1. An additional charge of £410.00 per dwelling will apply where the electrical work is not installed by a Part P registered electrician. (A Part P registered electrician is a qualified electrician who also has the necessary building regulation knowledge to enable his/her accreditation body or competent person scheme to certify his/her work)

2. Should submitted structural calculations be produced by a non-qualified person, additional charges are likely to be requested to cover the cost of checking those calculations (usually £150 + Vat per check). If calculations have to be checked more than once due to needing corrections or similar then additional fees may also apply.

3. Multiple works; where more than one category of works noted above is to be undertaken at the same time, a 50% discount of the smallest plan charge fee will be deducted. i.e., single storey extension under 10m² plan charge of £135.30 and a loft conversion plan charge of £193.70 the total plan charge would be, £135.30 – 50% = £67.85 + £193.70 total fee £261.55.

### Notes:

* This charge is reduced by 50% of if the building work is carried out at the same time as other building work described in table B.

# Renovation of a thermal element means the provision of a new layer to a wall, floor or roof (it does not include windows, doors, roof windows or roof lights) or the replacement of an existing layer which separates a thermally conditioned part of the building from the external environment, another part of the building which is unconditioned or another part of the building which is conditioned to a different temperature.

1. An additional charge of £410.00 per dwelling will apply where the electrical work is not installed by a Part P registered electrician. (A Part P registered electrician is a qualified electrician who also has the necessary building regulation knowledge to enable his/her accreditation body or competent person scheme to certify his/her work)

2. Should submitted structural calculations be produced by a non-qualified person, additional charges are likely to be requested to cover the cost of checking those calculations (usually £150 + Vat per check). If calculations have to be checked more than once due to needing corrections or similar then additional fees may also apply.
